---

I recently came across a set of Twitter tools for Powerpoint from Timo Elliott - click [here](#) to get them.

You'll see that they are all .swf files so could also be used elsewhere such as in an html page.

Here's an example - add a search term in the box in the bottom left corner such as a hashtag (Hash tags are used in twitter to identify posts on specific topics such as #lt10uk for Learning Technologies conference, 2010)
